

My Keys

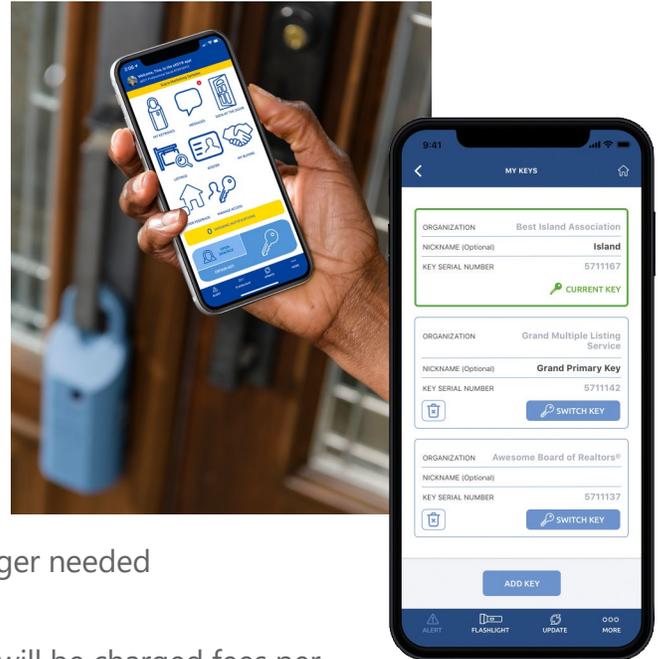

Access multiple keys at your fingertips

Supra now offers users of the eKEY® app the ability to easily use keys from multiple organizations from the convenience of their mobile device. This solution is ideal for agents who work across regions and eliminates the need to reauthorize each time they switch to a different key. It's like a virtual key ring – all authorized keys are right at your fingertips!

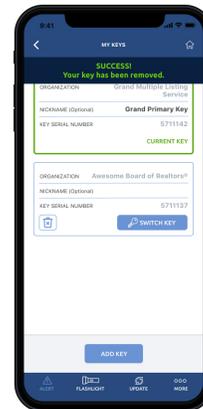

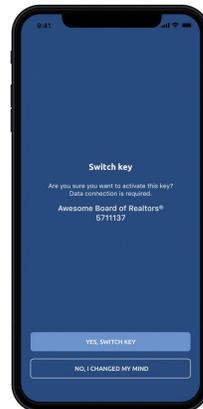

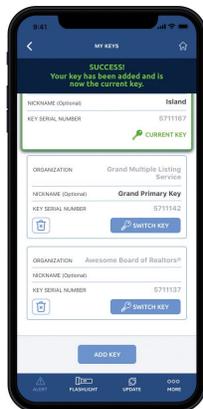

This solution lets agents manage multiple keys within the eKEY app through the "My Keys" feature, which allows users to:

- Add and authorize multiple keys¹
- Switch keys easily without reauthorizing
- Assign nicknames to easily identify keys
- Remove keys from the device² when they are no longer needed
- Manage keys with a working data connection

NOTE: Any key that user has authorized on their device will be charged fees per pricing set for each organization associated with that key.

It's easy to add, switch, and remove keys from your mobile device!

1 – Requires keyholder be set up through managing organization.

2 – Keyholders are still responsible for key fees as long as a key serial number is assigned to them. Keyholders wishing to cancel any key service from their account must do so through the issuing organization.
